

SYED MINHAJ UR RAHMAN

Network Engineer | NOC Engineer | Cybersecurity Analyst | IT Support

📞 9652995760 ✉️ syedminhajrahman@gmail.com 📍 Hyderabad, Telangana, India 🌐 syedminhajrahman-cmyk.github.io/portfolio

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science graduate (2026) from Mumtaz College of Engineering & Technology, Hyderabad, with a strong foundation in networking, IT infrastructure, and cybersecurity fundamentals. Hands-on experience in Cisco Packet Tracer lab design, VMware-based server administration, Linux & Windows Server deployment, and real-world volunteer technical support. Currently pursuing CCNA certification and actively exploring SOC/cybersecurity domains. Next goal is to expand into cloud networking (AWS/Azure) and network automation using Python and Ansible, aligning with the industry shift towards Infrastructure-as-Code and DevNetOps practices. Seeking an entry-level role as a Network Engineer, NOC Analyst, Cybersecurity Analyst, or IT Support Engineer where I can immediately contribute and accelerate professional growth.

CORE COMPETENCIES

► Routing & Switching	► Cisco IOS CLI	► Linux System Administration	► Cybersecurity Fundamentals
► VLAN Design & Trunking	► Cisco Packet Tracer	► Windows Server Administration	► Firewall Fundamentals
► Dynamic Routing (RIP/EIGRP/OSPF)	► Network Troubleshooting	► VMware Workstation	► IBM AI Fundamentals
► ACL Implementation	► TCP/IP & OSI Model	► VM Deployment & Lab Setup	► HTML / CSS / C (Beginner)
► NAT / PAT Configuration	► Spanning Tree Protocol (STP)	► Active Directory Basics	► Python (Beginner)
			► Technical Documentation

WORK EXPERIENCE

Technical Support Volunteer

Mar 2026 – Present · 4 months · Part-time / On-site

Talent Development Centre (TDC) · Hyderabad, Telangana, India

Supporting networking and server administration training labs for new students in a hands-on environment. Acting as the first point of technical contact for installation, configuration, and connectivity issues.

- Set up lab environments for 20+ students covering VMware Workstation, Windows Server, and Linux Server configurations from scratch.
- Guided installation and configuration of virtual machines including OS setup, network adapter settings, and snapshot management.
- Provided system administration support: user account management, IP/DNS configuration, file-system permissions, and service management.
- Diagnosed and resolved common connectivity, driver, and configuration errors during live practical lab sessions.
- Mentored beginners on core networking and server administration concepts using structured OSI-model-based explanations.
- Documented recurring issues and their resolutions to build an internal troubleshooting knowledge base for the centre.

Key Skills Demonstrated: VMware Workstation · Windows Server · Linux System Administration · Network Configuration · Troubleshooting · Technical Mentoring · Documentation

EDUCATION

Bachelor of Technology – Computer Science (B.Tech CSE)

2022 – 2026 (Expected)

Mumtaz College of Engineering and Technology • Hyderabad, Telangana

CGPA: 7.9 / 10.0 • 4th Year • Relevant Focus: Networking, Routing & Switching, Systems Administration, CCNA Preparation, Cybersecurity

Intermediate (MPC) – Sri Chandra Junior College

GPA: 7.8 / 10.0 • Passed: March 2021 • Stream: MPC • Hyderabad, Telangana

Secondary School Certificate (SSC) – Paragon High School

GPA: 8.0 / 10.0 • Passed: March 2019 • Hyderabad, Telangana

NETWORKING PROJECTS (CISCO PACKET TRACER)

1. Enterprise Network Infrastructure Design • Tool: Cisco Packet Tracer

- Designed a complete multi-floor enterprise topology using Cisco routers, Layer-3 switches, and end devices.
- Implemented VLANs (HR, Finance, IT) with inter-VLAN routing via Layer-3 switch, improving traffic segmentation and security.
- Configured a centralised DHCP server for automatic IP assignment across all VLANs, eliminating manual addressing errors.
- Applied port security and basic ACLs as foundational access-control policies for each department network.

2. Dynamic Routing Protocol Comparison & Configuration • Tool: Cisco Packet Tracer

- Configured and compared RIPv2, EIGRP, and OSPF across a multi-router topology to analyse protocol behaviour and convergence.
- Verified route propagation and summarisation, optimising routing tables for efficiency.
- Tested end-to-end connectivity and documented convergence times, producing a protocol-comparison reference for academic use.

3. ACL-Based Network Security Implementation • Tool: Cisco Packet Tracer

- Created Standard ACLs to restrict inbound/outbound traffic based on source IP address ranges per department.
- Implemented Extended ACLs filtering on source, destination, protocol, and port — reducing attack surface between segments.
- Simulated unauthorised access scenarios and confirmed ACL enforcement by verifying dropped packets in simulation mode.
- Documented layered access-control strategy as a reference for real-world firewall policy design.

4. NAT & PAT Configuration for Internet Access Simulation • Tool: Cisco Packet Tracer

- Configured Static NAT to map dedicated public IPs to internal servers for consistent external reachability.
- Implemented Dynamic NAT for a pool of internal hosts, enabling scalable external access management.
- Configured PAT (NAT Overload) allowing multiple internal hosts to share a single public IP using port differentiation.
- Verified address translation tables and end-to-end internet access simulation through Cisco IOS show and debug commands.

5. Advanced Switching & VLAN Management • Tool: Cisco Packet Tracer

- Configured VLANs with 802.1Q trunking between switches for proper Layer-2 traffic segmentation.
- Implemented Spanning Tree Protocol (STP) to eliminate switching loops and ensure network stability.
- Configured EtherChannel (LACP) bundling multiple physical links for increased bandwidth and link redundancy.
- Applied port security policies to restrict unauthorised device connections and prevent MAC flooding attacks.

6. Systematic Network Troubleshooting Lab • Tool: Cisco Packet Tracer

- Diagnosed and resolved routing loop issues using show ip route, traceroute, and debug ip rip commands.
- Identified and corrected incorrect subnetting configurations that caused host unreachability, restoring end-to-end connectivity.
- Fixed VLAN mismatches causing inter-department communication failures by verifying trunk encapsulation and allowed VLAN lists.
- Practised and documented a structured OSI-model-based troubleshooting methodology applicable to real-world NOC scenarios.

TECHNICAL SKILLS

Networking & Protocols

- ▶ Routing & Switching (CCNA Level)
- ▶ Static & Dynamic Routing – RIPv2, EIGRP, OSPF
- ▶ VLAN Design & 802.1Q Trunking
- ▶ ACL – Standard & Extended
- ▶ NAT / PAT / Port Security
- ▶ STP, EtherChannel (LACP)
- ▶ DHCP, DNS, TCP/IP, OSI Model

Security & Cybersecurity

- ▶ Cybersecurity Fundamentals (IBM SkillsBuild)
- ▶ Firewall Fundamentals & Policy Design
- ▶ Access Control Policies & Firewall Concepts
- ▶ Network Traffic Filtering & ACL Design
- ▶ SOC Concepts & Security Monitoring (Learning)
- ▶ Incident Detection Principles (Learning)
- ▶ Vulnerability Awareness & Patch Concepts
- ▶ Secure Lab Environment Design

Systems & Virtualization

- ▶ Linux System Administration (Ubuntu/CentOS)
- ▶ Windows Server Administration
- ▶ VMware Workstation – VM Deployment & Config
- ▶ User Account & Permissions Management
- ▶ Network Configuration in VM Environments
- ▶ Snapshot, Cloning & Lab Environment Setup
- ▶ Unix Fundamentals

Tools & Programming

- ▶ Cisco Packet Tracer (Advanced)
- ▶ Cisco IOS CLI – show, debug, configure commands
- ▶ Network Troubleshooting Methodology
- ▶ HTML, CSS (Intermediate)
- ▶ C Programming (Beginner)
- ▶ Python (Beginner)
- ▶ Technical Documentation & Reporting

CERTIFICATIONS & ACHIEVEMENTS

 **Hackathon 2025 – 1st Place Winner** | Mumtaz College of Engineering & Technology · 27 February 2025
Recognised for exceptional problem-solving, innovation, and dedication at the college-level hackathon event.

❖ **Artificial Intelligence Fundamentals** | IBM SkillsBuild · Dec 2024

◆ **Getting Started with Cybersecurity** | IBM SkillsBuild · 2025

◆ **CCNA Routing & Switching Preparation** | Self-Study (Cisco Official Material) · 2024 – Present

◆ **Linux Practical Lab Completion** | Mumtaz College of Engineering & Technology · 2025

NOC & CYBERSECURITY READINESS

Beyond formal training, I actively build readiness for real-world operations and security roles through:

- Network Operations Centre (NOC): Strong understanding of network topology monitoring, fault isolation using OSI-model methodology, and incident documentation — directly transferable from Packet Tracer troubleshooting labs and TDC volunteer experience.
- Cybersecurity: Completed IBM SkillsBuild Cybersecurity fundamentals; familiar with CIA triad, common attack vectors (DoS, phishing, MITM), defence-in-depth principles, and basic ACL-based perimeter control.
- IT Support: Proven ability to diagnose and resolve hardware, OS, networking, and virtualisation issues under time pressure across Windows and Linux environments.
- Continuous Learning: Currently pursuing CCNA and SOC Analyst track content — studying network monitoring, log analysis, and alert triage. Next goal is to learn cloud networking (AWS/Azure) and network automation (Python, Ansible) to stay aligned with modern Infrastructure-as-Code and DevNetOps practices.

KEY PROFESSIONAL STRENGTHS

Analytical & Systematic

Applies structured OSI-model-based troubleshooting, never guessing — always diagnosing layer by layer.

Fast Learner

Independently mastered Cisco IOS, Linux administration, and VMware from self-study; adapted quickly to real support environments.

Team Collaboration

Demonstrated at TDC: worked alongside instructors, supported peers, and maintained a positive lab atmosphere.

Documentation Habit

Consistently documents lab configurations, troubleshooting steps, and resolutions — a critical skill for NOC/IT Support roles.

Goal-Oriented

Proactively seeking CCNA certification while simultaneously volunteering, maintaining academic standing, and expanding cybersecurity knowledge.

Calm Under Pressure

Comfortable handling live lab emergencies and student issues calmly — essential for 24x7 NOC and support environments.

PERSONAL INFORMATION

Date of Birth 20 July 2003	Gender Male	Nationality Indian	Marital Status Unmarried
